

CONTENTS

Preface	v
---------	---

1. GENERAL

Progress in condensed matter nuclear science <i>A. Takahashi</i>	1
Summary of ICCF-12 <i>X. Z. Li</i>	26
Overview of light water/hydrogen-based low-energy nuclear reactions <i>G. H. Miley and P. J. Shrestha</i>	34

2. EXCESS HEAT AND He DETECTION

Development of “DS-reactor” as the practical reactor of “cold fusion” based on the “DS-cell” with “DS-cathode” <i>Y. Arata and Y.-C. Zhang</i>	44
Progress in excess of power experiments with electrochemical loading of deuterium in palladium <i>V. Violante, S. Moretti, M. Bertolotti, E. Castagna, C. Sibilia, F. Sarto, M. McKubre, F. Tanzella, I. Dardik, S. Lesin and T. Zilov</i>	55
Anomalous energy generation during conventional electrolysis <i>T. Mizuno and Y. Toriyabe</i>	65
“Excess heat” induced by deuterium flux in palladium film <i>B. Liu, X. Z. Li, Q. M. Wei, N. Mueller, P. Schoch and H. Oehre</i>	75
Abnormal excess heat observed during Mizuno-type experiments <i>J.-F. Fauvarque, P. P. Clauzon and G. J.-M. Lallevé</i>	80
Seebeck envelope calorimetry with a Pd D ₂ O + H ₂ SO ₄ electrolytic cell <i>W.-S. Zhang, J. Dash and Q. Wang</i>	86
Observation and investigation of nuclear fusion and self-induced electric discharges in liquids <i>A. I. Koldamasov, H. I. Yang, D. B. McConnell, A. A. Kornilova, V. I. Vysotskii and A. V. Desyatov</i>	97

Description of a sensitive seebeck calorimeter used for cold fusion studies <i>E. Storms</i>	108
Some recent results at ENEA <i>M. Apicella, E. Castagna, L. Capobianco, L. D'Aulerio, G. Mazzitelli, F. Sarto, A. Rosada, E. Santoro, V. Violante, M. McKubre, F. Tanzella and C. Sibilìa</i>	117
Heat measurement during plasma electrolysis <i>K. Iizumi, M. Fujii, S. Mitsushima, N. Kamiya and K.-I. Ota</i>	133
Effect of an additive on thermal output during electrolysis of heavy water with a palladium cathode <i>Q. Wang and J. Dash</i>	140
Thermal analysis of calorimetric systems <i>L. D'Aulerio, V. Violante, E. Castagna, R. Fiore, L. Capobianco, PR. Del Prete, F. Tanzella and M. McKubre</i>	145
Surface plasmons and low-energy nuclear reactions triggering <i>E. Castagna, C. Sibilìa, S. Paoloni, V. Violante and F. Sarto</i>	156
Production method for violent TCB jet plasma from cavity <i>F. Amini</i>	163
New results and an ongoing excess heat controversy <i>L. Kowalski, G. Luce, S. Little and R. Slaughter</i>	171

3. TRANSMUTATION

Observation of surface distribution of products by X-ray fluorescence spectrometry during D_2 gas permeation through Pd Complexes <i>Y. Iwamura, T. Itoh, M. Sakano, N. Yamazaki, S. Kuribayashi, Y. Terada and T. Ishikawa</i>	178
Discharge experiment using Pd/CaO/Pd multi-layered cathode <i>S. Narita, H. Yamada, D. Takahashi, Y. Wagatsuma, S. Taniguchi and M. Itagaki</i>	188
Producing transmutation element on multi-layered Pd sample by deuterium permeation <i>H. Yamada, S. Narita, S. Taniguchi, T. Ushirozawa, S. Kurihara, M. Higashizawa, H. Sawada, M. Itagaki and T. Odashima</i>	196

- Experimental observation and combined investigation of high-performance fusion of iron-region isotopes in optimal growing microbiological associations 206
V. I. Vysotskii, A. A. Kornilova, A. B. Tashirev and J. Kornilova
- Research into low-energy nuclear reactions in cathode sample solid with production of excess heat, stable and radioactive impurity nuclides 214
A. B. Karabut
- Influence of parameters of the glow discharge on change of structure and the isotope composition of the cathode materials 231
I. B. Savvatimova and D. V. Gavritenkov
- Elemental analysis of palladium electrodes after Pd/Pd light water critical electrolysis 253
Y. Toriyabe, T. Mizuno, T. Ohmori and Y. Aoki
- Progress on the study of isotopic composition in metallic thin films undergone to electrochemical loading of hydrogen 264
M. Apicella, V. Violante, F. Sarto, A. Rosada, E. Santoro, E. Castagna, C. Sibilina, M. McKubre, F. Tanzella and G. Hubler
- In situ* accelerator analyses of palladium complex under deuterium permeation 272
A. Kitamura, R. Nishio, H. Iwai, R. Satoh, A. Taniike and Y. Furuyama
- High-resolution mass spectrum for deuterium (hydrogen) gas permeating palladium film 278
Q. M. Wei, X. Z. Li, B. Liu, N. Mueller, P. Schoch and H. Oehre
- ICP-MS analysis of electrodes and electrolytes after HNO₃/H₂O electrolysis 284
S. Taniguchi, S. Shimada, H. Yamada, S. Narita, T. Odashima, N. Teshima and T. Ohmori
- The Italy-Japan project — Fundamental research on cold transmutation process for treatment of nuclear wastes 289
A. Takahashi, F. Celani and Y. Iwamura

4. NUCLEAR PHYSICS APPROACH

- Reproducible nuclear emissions from Pd/PdO:D_x heterostructure during controlled exothermic deuterium desorption 293
A. G. Lipson, G. H. Miley, A. S. Roussetski, B. F. Lyakhov and E. I. Saunin
- Correct identification of energetic alpha and proton tracks in experiments on CR-39 charged particle detection during hydrogen desorption from Pd/PdO:H_x heterostructure 304
A. S. Roussetski, A. G. Lipson, B. F. Lyakhov and E. I. Saunin
- Intense non-linear soft X-ray emission from a hydride target during pulsed D bombardment 314
G. H. Miley, Y. Yang, A. Lipson, M. Haque, I. Percel and M. Romer
- Enhancement of first wall damage in ITER type TOKAMAK due to LENR effects 325
A. G. Lipson, G. H. Miley and H. Momota
- Generation of DD-reactions in a ferroelectric KD₂PO₄ single crystal during transition through curie point ($T_c = 220$ K) 336
A. G. Lipson, G. H. Miley, A. S. Roussetski and E. I. Saunin
- Study of energetic and temporal characteristics of X-ray emission from solid-state cathode medium of high-current glow discharge 344
A. B. Karabut
- A novel LiF-based detector for X-ray imaging in hydrogen loaded Ni films under laser irradiation 351
R. M. Montecali, S. Alnaviva, T. Marolo, M. A. Vincenti, F. Sarto, C. Sibilina, E. Castagna and V. Violante
- Observation and modeling of the ordered motion of hypothetical magnetically charged particles on the multilayer surface and the problem of low-energy fusion 356
S. V. Adamenko and V. I. Vysotskii

5. MATERIAL SCIENCE

- Evidence of superstoichiometric H/D leu_r active sites and high-temperature superconductivity in a hydrogen-cycled Pd/PdO 367
A. G. Lipson, C. H. Castano, G. H. Miley, B. F. Lyakhov, A. Yu. Tsivadze and A. V. Mitin

New procedures to make active, fractal-like surfaces on thin Pd wires <i>F. Celani, A. Spallone, E. Righi, G. Trenta, G. D'Agostaro, P. Quercia, V. Andreassi, O. Giacinti, P. Marini, V. Di Stefano, M. Nakamura, F. Todarello, E. Purchi, A. Mancini, P. G. Sona, F. Fontana, L. Gamberale, D. Garbelli, E. Celia, F. Falcioni, M. Marchesini, E. Novaro and U. Mastromatteo</i>	377
Using resistivity to measure H/Pd and D/Pd loading: Method and significance <i>M. C. H. McKubre and F. L. Tanzella</i>	392
Measurements of the temperature coefficient of electric resistivity of hydrogen overloaded Pd <i>A. Spallone, F. Celani, P. Marini and V. Di Stefano</i>	404
Magnetic interaction of hypothetical particles moving beneath the electrode/electrolyte interface to elucidate evolution mechanism of vortex appeared on Pd surface after long-term evolution of deuterium in 0.1 m LiOD <i>H. Numata and M. Ban</i>	411
Unusual structures on the material surfaces irradiated by low-energy ions <i>B. Rodionov and I. Savvatimova</i>	421
6. THEORY	
Context for understanding why particular nanoscale crystals turn-on faster and other LENR effects <i>S. R. Chubb</i>	430
Models for anomalies in condensed matter deuterides <i>P. L. Hagelstein</i>	441
Time-dependent EQPET analysis of TSC <i>A. Takahashi</i>	454
Unifying theory of low-energy nuclear reaction and transmutation processes in deuterated/hydrogenated metals, acoustic cavitation, glow discharge, and deuteron beam experiments <i>Y. E. Kim and A. L. Zubarev</i>	462

Catalytic fusion and the interface between insulators and transition metals <i>T. A. Chubb</i>	473
Multiple scattering of deuterium wave function near surface of palladium lattice <i>X. Z. Li, Q. M. Wei, B. Liu, N. N. Cai, S. X. Zheng and D. X. Cao</i>	482
Theoretical comparison between semi-classical and quantum tunneling effect <i>F. Frisone</i>	494
New cooperative mechanisms of low-energy nuclear reactions using super low-energy external field <i>F. A. Gareev and I. E. Zhidkova</i>	504
Polynutron theory of transmutation <i>J. C. Fisher</i>	516
The thermal conduction from the centers of the nuclear reactions in solids <i>K.-I. Tsuchiya</i>	521
Four-body RST general nuclear wavefunctions and matrix elements <i>I. Chaudhary and P. L. Hagelstein</i>	527
Study on formation of tetrahedral or octahedral symmetric condensation by hopping of alkali or alkaline-earth metal ion <i>H. Miura</i>	536
Calculations of nuclear reactions probability in a crystal lattice of lanthanum deuteride <i>V. A. Kirkinskii and Yu. A. Novikov</i>	542
Possible coupled electron and electron neutrino in nucleus and its physical catalysis effect on D-D cold fusion into helium in Pd <i>M. Fukuhara</i>	547
Tunnel resonance of electron wave and force of fluctuation <i>M. Ban</i>	555
Types of nuclear fusion in solids <i>N. Yabuuchi</i>	564

Neutrino–dineutron reactions (low-energy nuclear reactions induced by D ₂ gas permeation through Pd complexes — Y. Iwamura effect) <i>V. Muromtsev, V. Platonov and I. Savvatimova</i>	571
An explanation of earthquakes by the blacklight process and hydrogen fusion <i>H. Yamamoto</i>	577
Theoretical modeling of electron flow action on probability of nuclear fusion of deuterons <i>A. I. Goncharov and V. A. Kirkinskii</i>	582
Author Index	589
